# Aid-in-Dying: Should We Decriminalize Physician-Assisted Suicide and Physician-Committed Euthanasia?

**Creator:**

CeloCruz, Maria T.

**Bibliographic Citation:**

American Journal of Law and Medicine. 1992; 18(4): 369-394.

**Abstract:**

Recent news stories, medical journal articles, and two state voter referenda have publicized physicians' providing their patients with aid-in-dying. This Note distinguishes two components of aid-in-dying: physician-assisted suicide and physician-committed voluntary active euthanasia. The Note traces these components' distinct historical and legal treatments and critically examines arguments for and against both types of action. This Note concludes that aid-in-dying measures should limit legalization initiatives to physician-assisted suicide and should not embrace physician-committed voluntary active euthanasia.
